** If I cannot prove the LoA of the journal/IPR, I am willing to fully allow my scientific work to be uploaded to KC UMN and become the right of the UMN institution.

FOREWORD

All praise and gratitude to God Almighty for His blessings and guidance throughout the process of writing the author's Final Project, titled "Designing an Interactive Queuing Campaign in Public Spaces". With His grace, this project has been completed successfully within the given timeframe.

This Final Project is submitted as one of the requirements for obtaining a Bachelor's Degree in Design, majoring in Visual Communication Design at Multimedia Nusantara University.

The author acknowledges that the completion of this Final Project is made possible through the support and assistance of various parties, both directly and indirectly. Therefore, the author would like to express gratitude to:

1. Dr. Andrey Andoko, as the Rector of Universitas Multimedia Nusantara.
2. Muhammad Cahya Mulya Daulay, S.Sn., M.Ds., as the Dean of Faculty of Art and Design, Universitas Multimedia Nusantara.
3. Fonita Theresia Yoliando, S.Ds., M.A., as the Head of Visual Communication Design Study Program Universitas Multimedia Nusantara.
4. Hadi Purnama, S.Ds., M.M., as the Mentor who has provided guidance, direction, and motivation that brought this final project to completion.
5. My family who has given constant moral and financial support, creating an environment that enabled the author to successfully complete this final project.
6. Claudia Eva Ganda as the Head of Production of Warhol Agency, Yohana Sondang Activa Hutabarat, S. Psi. as a certified Clinical Psychologist, and Interview participants for providing information required for this project.

DESIGNING AN INTERACTIVE QUEUING CAMPAIGN IN PUBLIC SPACES

(Devina Giovani)

ABSTRACT

Queuing is a common daily activity in which individuals wait their turn to receive goods or services in a particular setting. Despite how common this habit is, many people still struggle doing it, even though they are aware of the positive personal values such as discipline and patience brought from this practice. The level of public discipline in Indonesia, particularly in queuing, remains low. Frequent media reports highlight these issues, showing that repeated undisciplined behaviors are becoming normalized in daily life. Restoring public awareness of the importance of queuing discipline can contribute in enhancing social order and overall quality of life. This study proposes the design of an interactive queuing awareness campaign in public spaces. The design methodology follows The Design Thinking Method which encompasses five stages of empathize, define, ideate, prototype, and test. The author utilized qualitative design approach, incorporating data collection techniques such as observations, in-depth and expert interviews, existing studies, reference studies, alpha test, and beta test for the creation of an interactive queuing campaign. The research findings underscore the need for an awareness campaign to raise citizens discipline rate.

Keywords: campaign, queuing, public spaces

PERANCANGAN KAMPANYE ANTRE

INTERAKTIF DI RUANG PUBLIK

(Devina Giovani)

ABSTRAK (Bahasa Indonesia)

Mengantrre merupakan sebuah kegiatan individu menunggu giliran untuk mendapatkan produk atau jasa di suatu tempat tertentu. Aktivitas ini sering didapati dalam keseharian, namun banyak masyarakat kesulitan dan gagal dalam menjalankannya dengan benar meskipun secara sadar paham bahwa perilaku disiplin antri melatih nilai positif kualitas pribadi. Faktanya, tingkat disiplin di Indonesia relatif masih rendah. Banyaknya laporan di media membahas topik ini, menunjukkan bahwa perilaku tidak disiplin yang berulang makin saat ini dianggap hal yang normal dalam keseharian. Mengembalikan kesadaran pada masyarakat akan pentingnya disiplin antri akan memberikan kontribusi dalam meningkatkan aturan hidup dan taraf hidup secara keseluruhan. Berdasarkan pemaparan tersebut, penulis mengajukan perancangan kampanye interaktif antrre di ruang publik. Metode perancangan yang digunakan adalah The Design Thinking Method yang meliputi tahapan empathize, define, ideate, prototype, dan test. Penulis menggunakan metodologi perancangan kualitatif yang meliputi teknik pengumpulan data berupa observasi, wawancara tatap wajah dan wawancara dengan para ahli, studi eksisting, studi referensi, alpha test, dan beta test dalam merancang kampanye antrre interaktif. Hasil riset menunjukkan perlunya perancangan kampanye sadar antri yang mampu meningkatkan tingkat disiplin masyarakat.

Kata kunci: *kampanye, antrre, tempat publik*
